

# AI Ecosystem

Understanding AI Market Landscape, Building Team, Business Value & Projects Overview

**Himanshu Ramchandani**

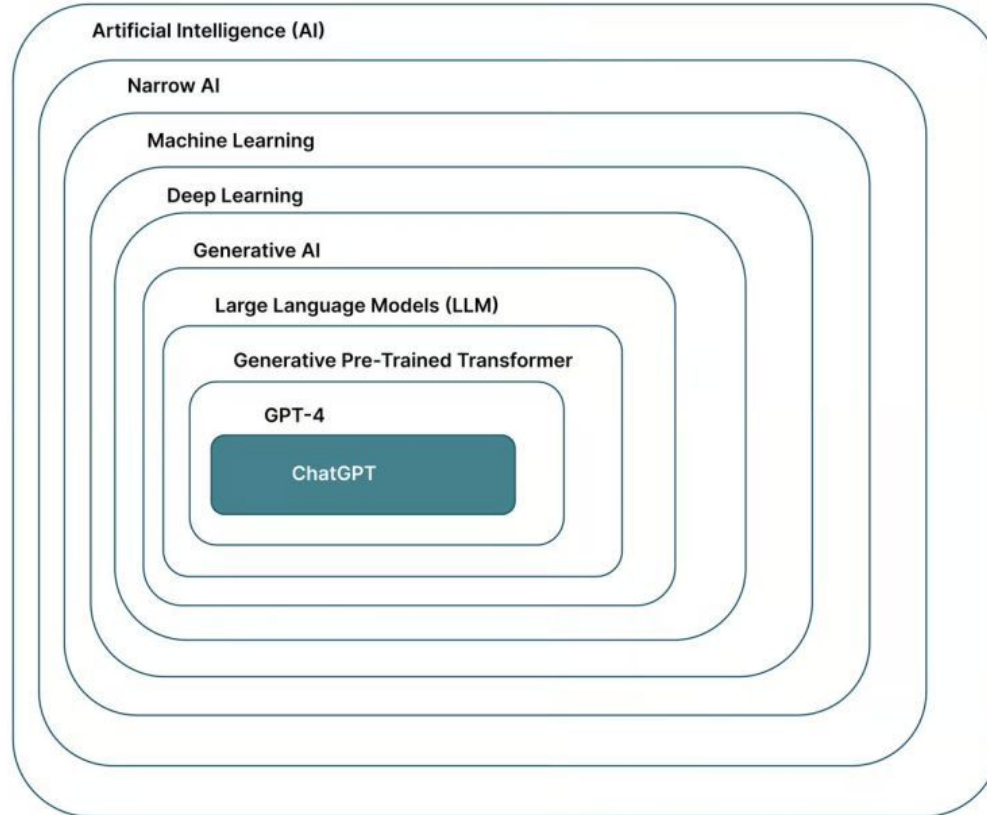

Microsoft MVP

# Table of Contents

- AI market growth and its relevance to your industries.
- Business opportunities: Efficiency, cost savings, and competitive edge.
- AI evolution: From neurons to neural networks, RNNs, CNNs, LSTMs, transformers, and LLMs.
- How do we test the application effectiveness?
- Limitations of LLMs and need for augmenting them like Fine tuning, RAG etc
- LLM Evolution to Agents and Agentic AI solutions (Intro only)

# Artificial Intelligence Taxonomy

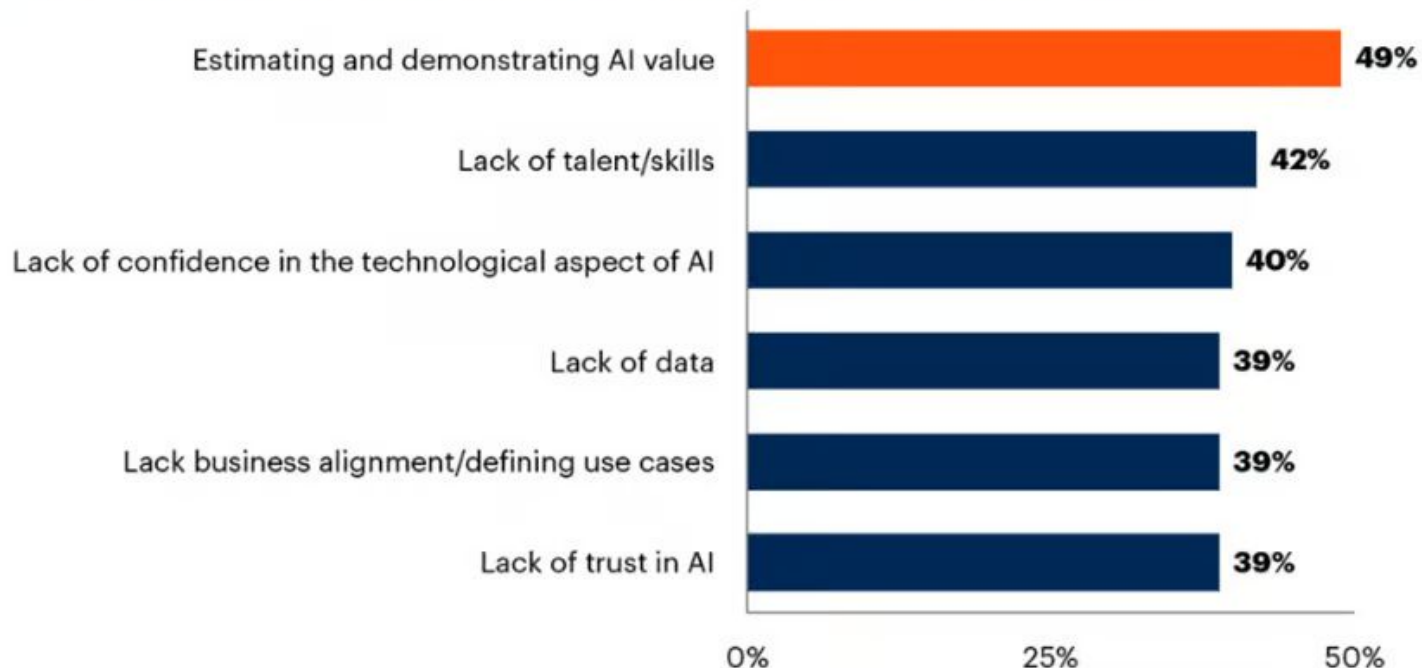

# AI Landscape 2025

2 major challenges businesses face with AI right now:

- estimating and demonstrating AI value
- lack of talent/skills

**Figure 1: Top Barriers to Implement AI Techniques (Sum of Top 3 Ranks)**

n = 632, leaders highly involved in AI; excludes "unsure"

Q. What are or will be the top 3 barriers to the implementation of AI techniques within your organization?

# AI market growth and its relevance to your industries.

- Valued at USD 233.46 billion in 2024 and
- Projected to reach USD 1,771.62 billion by 2032
- The AI chips market has quadrupled in value since 2021 (\$10.8 billion), reaching \$44.3 billion in 2025.

## Capital Raised by AI Startups in 2023

## AI's Impact on the Financial Services Industry's Revenue

# Applications by Industry

- In manufacturing, AI systems optimize production lines, predict equipment failures before they occur, and significantly improve quality control processes
- Financial institutions deploy AI systems for fraud detection, risk management, and investment advisory services

**With generative AI added to the picture, 30 percent of hours worked today could be automated by 2030.**

**Midpoint automation adoption<sup>1</sup> by 2030 as a share of time spent on work activities, US, %**

Himanshu Ramchandani

# Business opportunities

Efficiency, cost savings, and competitive edge.

- Automated 40 operations daily, saving 40 hours monthly, showcasing efficiency gains (StepWise)

# JPMorgan Chase in Finance

Aspect	Details
Organization	JPMorgan Chase
AI Technologies Used	Document Parsing, Anomaly Detection, Machine Learning Algorithms
Key Applications	Reviewing legal documents, detecting fraudulent activities
Impact	Reduced document review time from 360,000 hours annually to seconds, enhanced fraud detection accuracy, significant reduction in financial losses

Himanshu Ramchandani

# AI Evolution

From neurons to neural networks, RNNs, CNNs, LSTMs, transformers, and LLMs.

# Neuron

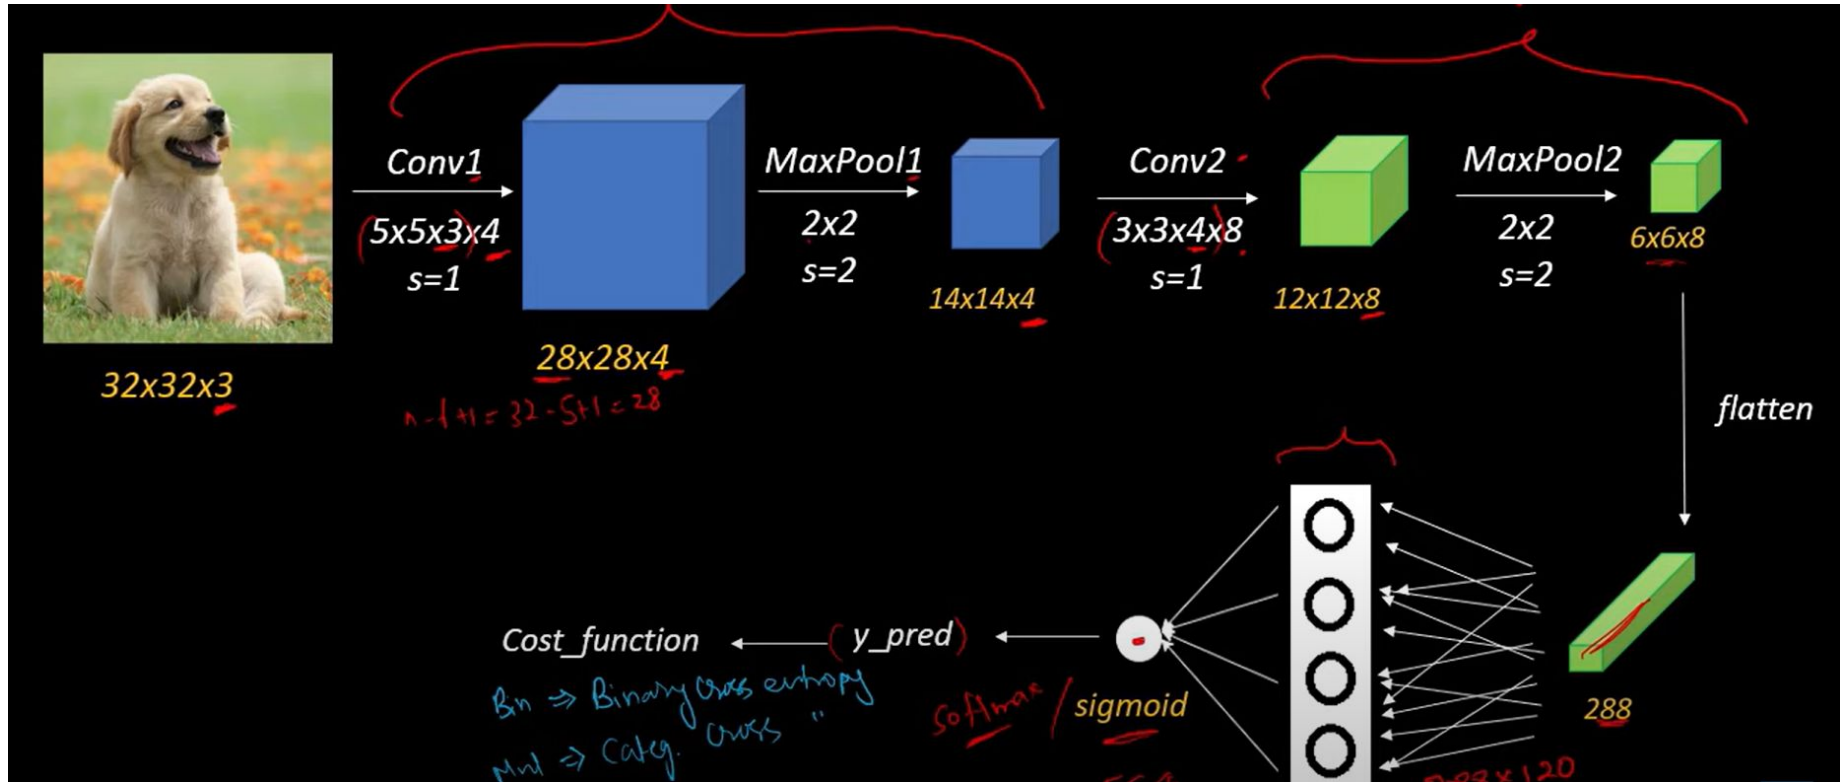

# Neural Networks

An example of a neuron showing the input ( $x_1 - x_n$ ), their corresponding weights ( $w_1 - w_n$ ), a bias ( $b$ ) and the activation function  $f$  applied to the weighted sum of the inputs.

# CNN (Convolutional Neural Network)

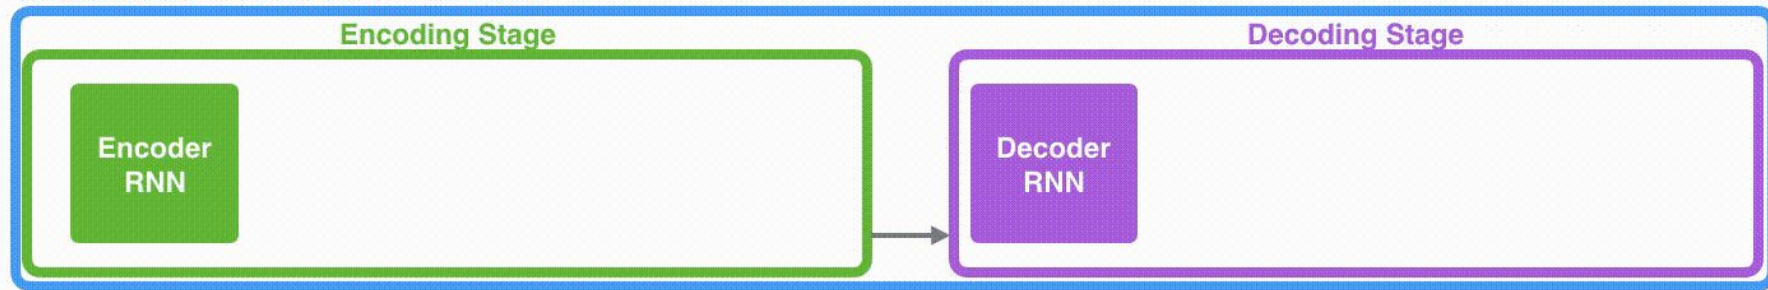

# Attention Mechanism

“**Himanshu** is an AI consultant. **He** is going to solve your problems.”

# RNN (Recurrent Neural Network)

## Neural Machine Translation SEQUENCE TO SEQUENCE MODEL

Je

suis

étudiant

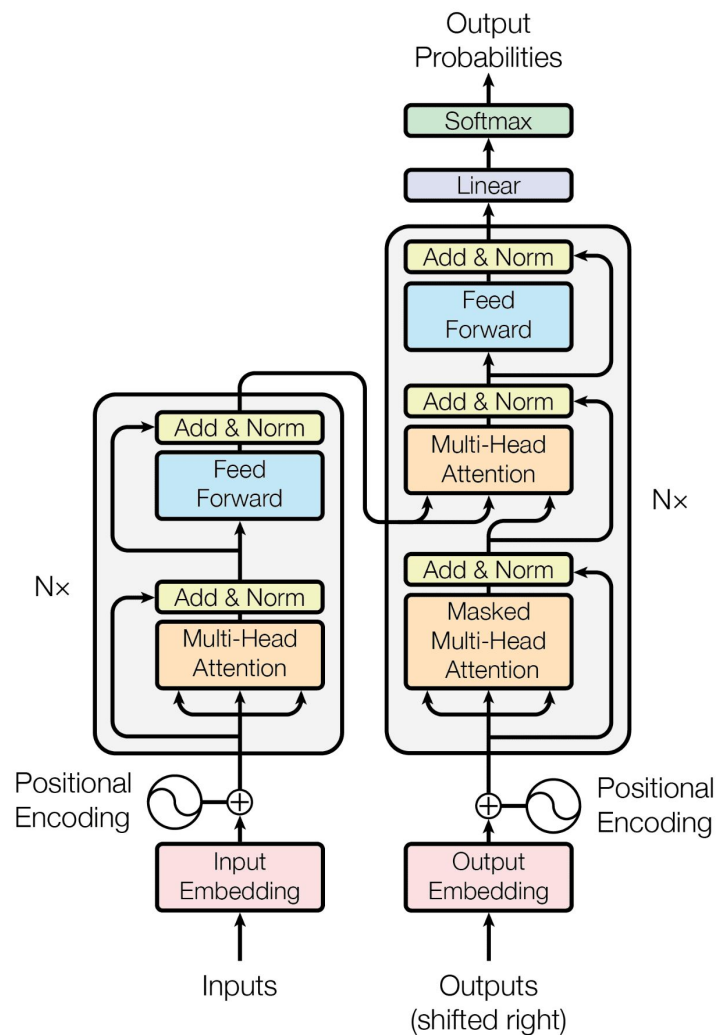

# LSTM (Long Short Term Memory)

# What exactly is GPT?

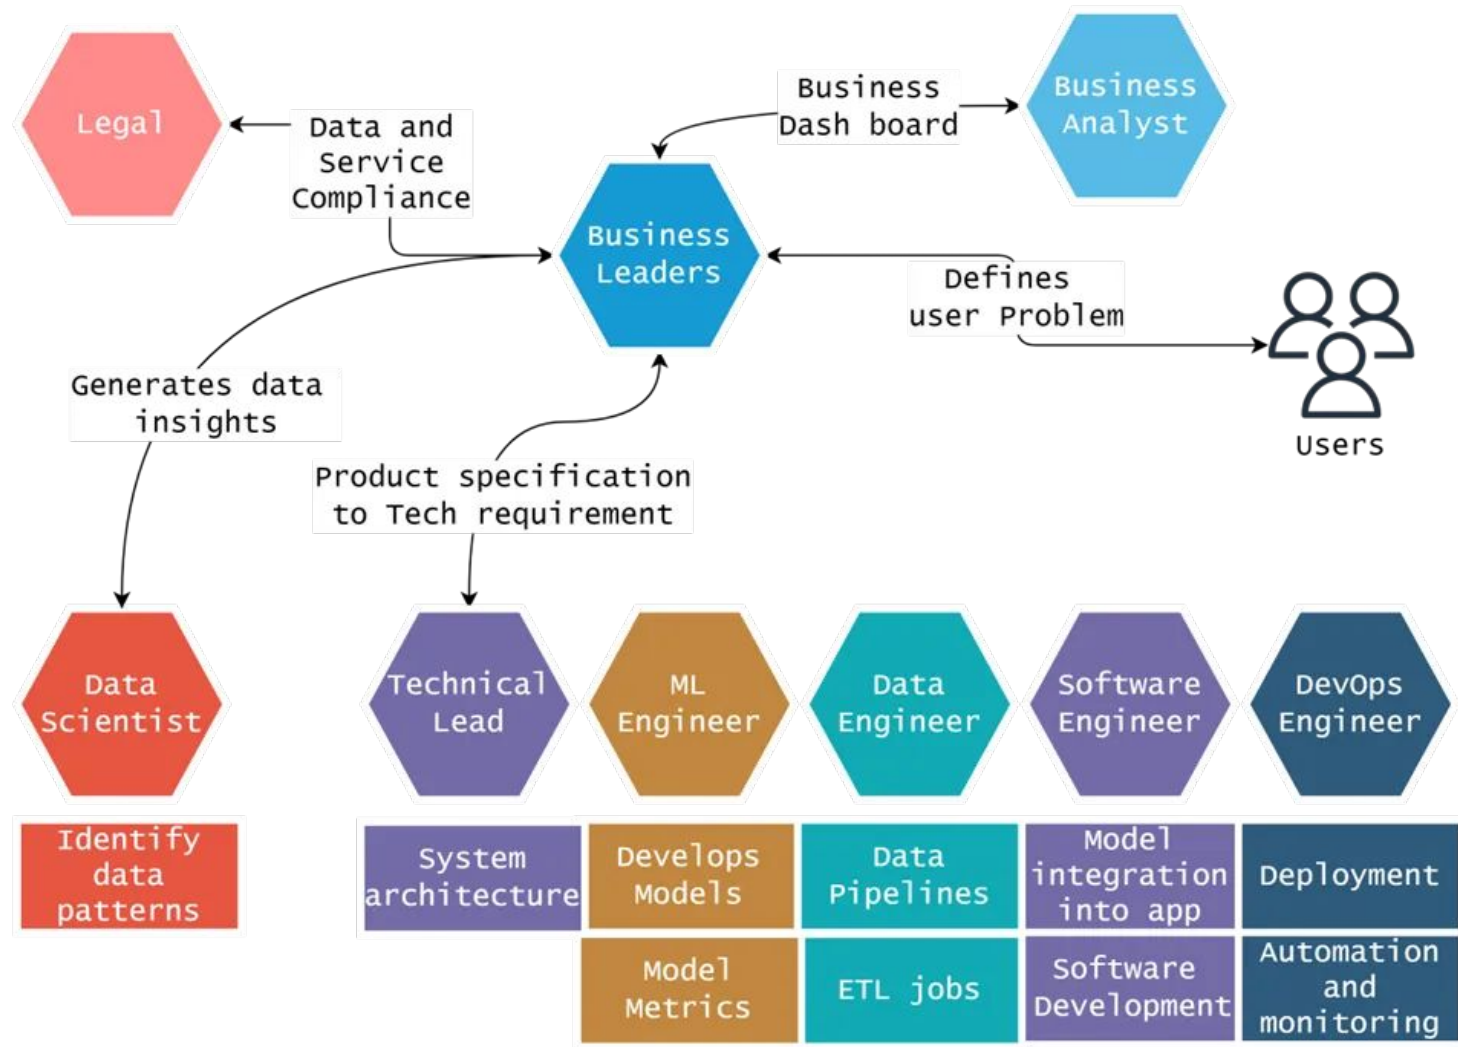

- Generative
- Pre-Trained
- Transformer

# Transformers

# Large Language Models

# How do we test the application effectiveness?

- Benchmark datasets (Humanity's Last Exam)
- OpenAI's Gym
- TensorFlow's TF-Agents
- Accuracy, response time, and resource utilization
- Monitoring tools like Prometheus
- HELM, CRFM, ARC, MLPerf, etc.

# Limitations of LLMs

- LLMs will always start fresh
- LLMs do not improve with use
- To get a better response, you must adapt to LLM

## Solutions:

- Fine-Tuning
- RAG Approaches

# LLM Evolution to Agents

From passive text generation to active task execution, decision-making, and process automation.

- The Bot Factory (for creating new AI agents)
- Creative Writers Workshop (supporting professional writers across genres)
- Entrepreneur Support Center (providing business planning, strategy, and legal guidance)
- Documentation & Marketing (specializing in technical documentation and marketing copy)
- Industry-specific support centers for legal, immigration, and other specialized domains
